

The UK's
No.1
for Taps &
Showers

NEW DESIGNS. NEW FINISHES.

Introducing our latest kitchen taps

PRODUCT BENEFITS EXPLAINED

SAFE TOUCH

Designed to keep the exterior cool to the touch, ensuring you're never at risk of scalding.

ECO START

The water starts cold, so you won't activate the boiler unless you move the lever from the central position, saving energy.

THERMACLICK

Thermaclick technology for family safety, a mid-point click indicating a comfortable handwashing temperature

PRECISE GLIDE

Features ceramic cartridges for long life durability and more precise control.

SECURE FIX

Comes with metal fixings to secure your tap in place, so it won't move or rotate during use.

EASY FIT INSTALLATION

Designed to make installation quicker and easier.

MATCHING TAPS/SHOWER

Matching taps and showers are available.

1 OUTLET

One shower outlet.

2 OUTLETS, 1 ON

Two shower outlets, which only run separately.

2 OUTLETS, 2 ON

Two shower outlets, which can both run at once.

3 OUTLETS, 2 ON

Three shower outlets, two of which can run at the same time.

DECOR SMART

Will use existing holes and fixings to fit in the same spot as your previous shower.

LUMINANCE CHROME

A hard-wearing, flawless finish that lasts for years. It's also scratch resistant and salt spray tested to ensure added durability.

FAMILY SAFE

Thermostatic temperature control and automatic stops prevent surges of hot or cold water.

RUB CLEAN

There's no need to scrub. Limescale build-up can be easily wiped off the nozzles of this shower product.

QUICK CHANGE

To change this product for something else, simply turn off the water supply and remove.

ECO-FRIENDLY

This shower saves as much water as possible (but it doesn't feel like it).

REJUVENATING

This shower uses a medium amount of water – just enough for a powerful, rejuvenating flow.

DRENCHING

This shower fully soaks you with water for the most indulgent showering experience.

ANTI-LIMESCALE

Reduces build up and helps extend product life.

Front cover Kitchen taps,

Pine, Monza & Axia (left to right), pages 147, 146, 141 (respectively)

THE CHOICE

Bristan is the UK's number one for taps and showers, with straightforward solutions for every bathroom and kitchen that you can trust time and time again.

For over 45 years, we've delivered exactly what we promise: reliable and long-lasting products, backed by incredible customer service.

With a team that knows taps and showers inside out, delivering whatever you need the very next day, all backed by award-winning customer service and technical support. We make choosing Bristan as easy as possible. Products are backed by guarantees of up to 10 years, making us the easy choice for taps and showers, every time.

EASY CHOICE

BRISTAN

New Designs, New Finishes.

Introducing our latest taps and showers

Molida, our European inspired tap collection with coordinating shower, adding a touch of depth and elegance to any bathroom. For a more timeless classic, we have introduced Cruzar to our range providing a classic, industrial look and feel. And finally, Hourglass

has been improved with the new energy saving Eco Start technology. All three ranges are available in coordinating showers and in the latest trend-led finishes. Making Bristan the easy choice for all bathroom refurb.

Hourglass

Taps
see page 56

Showers
see page 60

ECO START TAPS

Eco Start saves energy by having the cold water at the default central position of the tap handle. Hot water is only activated when the tap lever is moved from this default central position, so your boiler is not unnecessarily fired up.

NEW

New Qubo, Zing2 & Napoli showers.

The new Qubo, Zing2 and Napoli showers provide a fresh and modern feel, designed perfectly for any contemporary bathroom. All designs feature a hardwearing chrome finish with 5 year guarantee, are thermostatic for safe showering for the whole

family and include telescopic rigid risers. Qubo, now with Safe Touch is also available in the new trend-led finishes, black and brushed brass.

WALLMOUNT 12
The simplest solution for installing, maintaining and replacing bar showers.

RENAISSANCE

Traditional meets sophistication in Timeless Renaissance, a classically styled collection defined by subtle elegance and smooth lever handles. The fashionable detailing of these taps and showers fit perfectly into current interior trends. So, while inspired by times gone by, this enduring range will never get old. All built using the classic methods and precision of quality watchmakers.

choosing your shower booster pumps

The chart below supplies all the information required to allow you to select your Bristan Booster Pump. Pumps are rated in bar pressure, one bar pressure is equal to raising your cold water tank/cistern by 10 metres above its current position, so a 2.0 bar twin Bristan pump is the equivalent to raising your tank/cistern 20 metres above its current position. This will create a high pressure shower.

Pump Type	STPUMPI5TN	STPUMP20TN	STPUMP20SG	ST NHPUMP 20TN
Performance - Boost	Medium Boost	High Boost	High Boost	High Boost
Maximum Pressure / Flow Litres / Min	1.5 bar / 32 LPM	2.0 bar / 35 LPM	2.0 bar / 17 LPM	2.0 bar / 40 LPM
System Friendly - Peripheral Impeller	Twin	Twin	Single	Twin
Application - Single Shower / Mixer tap	•	•		
Application - Outlet Pump on Shower system or to boost individual Taps			•	
Fully Automatic Flow Switch Control	0.8 LPM sensitivity	0.8 LPM sensitivity	0.8 LPM sensitivity	0.8 LPM sensitivity
Motor - Powerful Induction Motor	385 Watts	420 Watts	215 Watts	430 Watts
Motor Rating @ 9 litres / minute	30 minutes (S3)	30 minutes (S3)	30 minutes (S3)	30 minutes (S3)
Power Supply - 230/1/50	•	•	•	•

Pump Selection

When selecting a pump, first check to see if the tap / shower to be pumped is designed for a low pressure or high pressure system. If designed for low pressure select our Medium Pressure 1.5 bar pump, however if it's designed for high pressure select our High Pressure 2.0 bar pump.

Twin Pumps

Twin pumps are designed to be installed between the cold water tank / cistern and the hot water cylinder so that they boost the water supply into the shower or tap.

Single Pumps

Single pumps can be used with a shower; the pump being installed to the mixer outlet, pumping the blended hot & cold water away from the shower valve and up to the shower head.

Single pumps can also be used to boost individual hot and cold tank fed water supplies to individual taps.

Controls

Bristan pumps are fitted with flow switches; these automatically start the pump once the flow from the shower / tap to be pumped exceeds 0.8 litres per minute. If your system has not got this minimum flow, contact Bristan for advice prior to purchase.

Pump Location

Bristan pumps are designed to be most effective pushing water, for this reason our preferred pump location is on the floor next to the hot water cylinder.

Hot & Cold Water Storage

Ensure that your Hot water cylinder & Cold water tank / cistern have sufficient capacity to meet the pumped demand.

Connections to the water supply

Cold Water Supply:

The pump must be supplied with a dedicated feed direct from the cold water storage tank / cistern.

Hot Water Supply:

The pump must be supplied with a dedicated feed direct from the hot water cylinder.

Connection using a Stuart Turner cylinder flange or factory fitted secondary tapping if fitting, or alternatively it can be the first draw off from the underside of the open-vent. Hot water should not exceed 65 degrees C entering the pump and must be free of air. Both hot and cold supply pipes should be fitted with full flow service valves to aid maintenance (not supplied)

Under no circumstances should the pump be connected either directly or indirectly to the cold water mains supply.

Electrical connection

The pump must be installed by a competent person to all relevant IEE Wiring Regulation (BS7671) and should be wired directly to a double pole fused spur, complying with BS 1363-4 and protected with a 5 Amp fuse.

Full fitting instructions are supplied with every Bristan Pump. These should be followed carefully.

Installed correctly your Bristan pump will give years of reliable service.

OUTLET FLOW REGULATORS

Flow regulators can easily be retro fitted between a mixer body/shower valve **outlet** connection and the shower hose. However, please note for **TMV2 approved products fitted on a combi boiler heating system**, it is recommended that flow

regulators are fitted between the mixer body and **both shower valve inlet connections**. This will ensure the valves performance is maintained, especially during the winter months, when the incoming water temperature is lower.

OUTLET FLOW REGULATORS

CODE	TYPE	PRICE
ECO SHW 04	4 litres per minute	£16.00 ** Grey
ECO SHW 05	5 litres per minute	£16.00 ** Yellow
ECO SHW 06	6 litres per minute	£16.00 ** Black
ECO SHW 07	7 litres per minute	£16.00 Green
ECO SHW 08	8 litres per minute	£16.00 White
ECO SHW 10	10 litres per minute	£16.00 Blue
ECO SHW 14	14 litres per minute	£16.00 Pink

**Not suitable for use where products are fitted on a Combi system
Please contact customer service on 0844 7016273 for details on inlet flow regulators.

FLOW REGULATORS & AERATORS - TAPS

FITTING A FLOW REGULATOR TO THE TAIL OF A TAP

Step One
The flow regulator will fit into the inlet of the tap.

Step Two
Carefully push the flow regulator into the inlet of the tap.

Step Three
Connect the pipework to the tap in the usual way.

FITTING AN AERATOR / SPRAY REGULATOR TO A TAP SPOUT

Step One
Carefully remove the existing flow straightener.

Step Two
Screw the new flow regulating aerator into place.

Step Three
Carefully tighten into the tap using a suitable spanner.

Choosing your Thermostatic Mixing Valve

Our range of thermostatic mixing valves includes a choice of options to meet the needs of your project.

Pipe valve size	Pressure (bar)								Valve type
	0.1	0.2	0.5	1	2	3	4	5	
Flow rate litres / min									
15mm	5	8.5	15	21.5	31				MT503
22mm	10	17	28	42	59	73	85	95	MT753
22mm	13	19	33	47	66	81	94	105	TS4753ECP
28mm	23	36	62	88	125	150	176	195	TS6000ECP

Choosing the right size mixing valve for your plumbing system requirements in three simple steps:

Step One

Calculate the pressure drop dependent on the flow rate through the fitting (e.g. with 7 litres per minute flow regulators) e.g. 7 litres per minute through a VR3000 showerhead
 = Pressure drop of... **A**
 7 litres per minute through a MEFC timed flow control
 = Pressure drop of... **B**

Step Two

Multiply the number of outlets by the required flow rate through each showerhead e.g. 7 litres per showerhead x 6 outlets = 42 litres per minute
 Refer to the table (below left). Locate the nearest flow rate value ensuring it is \geq than required. This gives the total pressure drop. **C**

Step Three

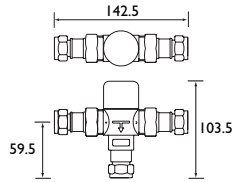

Add together **A + B + C** **D**

THERMOSTATIC MIXING VALVE

Contract

15mm Thermostatic Mixing Valve

- Automatic shutoff in the event of hot or cold water supply failure
- Check valves and serviceable filters as standard
- Operates at a maximum pressure differential of 10:1

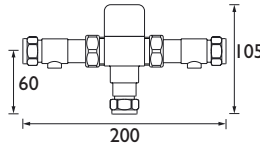

CODE	TYPE	Min. Press.	PRICE
MT503CP	15mm Mixing Valve	0.1 bar	POA

15mm Thermostatic Mixing Valve with Isolation

- Isolation at mixing point facilitates easy servicing
- Automatic shutoff in the event of hot or cold water supply failure
- Check valves and serviceable filters as standard

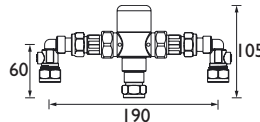

CODE	TYPE	Min. Press.	PRICE
MT503CP-ISO	15mm Mixing Valve Isol	0.1 bar	POA

15mm Thermostatic Mixing Valve with Isolation Elbows

- Elbows allow the valve to be concealed behind a pedestal
- Isolation at mixing point facilitates easy servicing
- Automatic shutoff in the event of hot or cold water supply failure

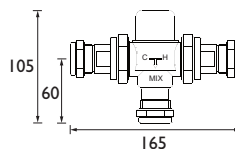

CODE	TYPE	Min. Press.	PRICE
MT503CP-ISOELB	15mm Mixing Valve Isol	0.1 bar	POA

22mm TMV3 Thermostatic Mixing Valve

- High and low pressure bath fill applications
- Automatic shutoff in the event of hot or cold water supply failure
- Check valves and serviceable filters as standard

CODE	TYPE	Min. Press.	PRICE
MT753CP	22mm Mixing Valve	0.1 bar	POA

- Smooth machined internal waterways to help limit the build-up of bacteria within the tap body

CODE	TYPE	Min. Press.	PRICE
SOLO-NM SL	Basin Mixer	0.5 bar	POA

Non-Thermostatic Healthcare Tap with Long Lever Handle

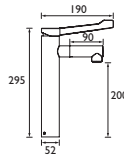

- Pressure balancing basin mixer tap with long lever handle
- Removable spout to aid infection control regimes
- Smooth machined internal waterways to help limit the build-up of bacteria within the tap body

CODE	TYPE	Min. Press.	PRICE
SOLO-NM LL	Basin Mixer	0.5 bar	POA

Non-Thermostatic Tall Pillar Healthcare Tap with Long Lever Handle

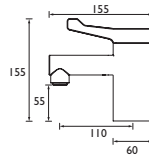

- Pressure balancing tall basin mixer tap with long lever handle
- Removable spout to aid infection control regimes
- Smooth machined internal waterways to help limit the build-up of bacteria within the tap body

CODE	TYPE	Min. Press.	PRICE
SOLO-NMT LL	Basin Mixer	0.5 bar	POA

TMV3 Mono Basin Mixer with Short Lever Handle (no waste)

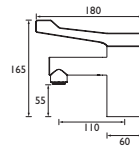

- Complies with HTM04-01
- Above basin access to serviceable parts, limiting down time
- Supplied with copper tails

CODE	TYPE	Min. Press.	PRICE
SOLO2-T3SL	Basin Mixer	0.2 bar	POA

TMV3 Mono Basin Mixer with Long Lever Handle (no waste)

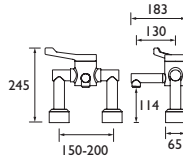

- Complies with HTM04-01
- Above basin access to serviceable parts, limiting down time
- Supplied with copper tails

CODE	TYPE	Min. Press.	PRICE
SOLO2-T3LL	Basin Mixer	0.2 bar	POA

Single Control Deck Mounted Basin Mixer

- Complies with HTM04-01
- Integral flush system assists against infection
- 1-step isolation and filter removal

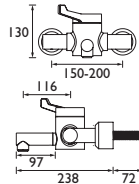

CODE	TYPE	Min. Press.	PRICE
H64DMT2	Basin Mixer	0.2 bar	POA

Single Control Wall Mounted Basin Mixer

- Complies with HTM04-01
- Integral flush system assists against infection
- 1-step isolation and filter removal

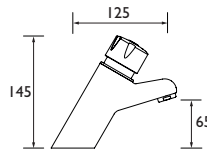

CODE	TYPE	Min. Press.	PRICE
H64WMT2	Basin Mixer	0.2 bar	POA

Timed Flow Temperature Control Basin Mixer

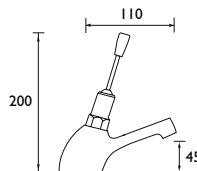

- Timed shut off to meet BS EN 816
- Max temperature limiter (adjustable) for user safety
- Vandal resistant 'release to activate' mechanism

CODE	TYPE	Min. Press.	PRICE
Z TC 1/2 C	Basin Mixer	1.0 bar	POA

Single Toggle Lever Basin Tap (with flow regulator)

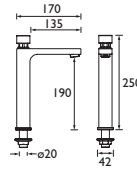

- Approx. 15 second shut off
- Supplied with both hot and cold indices
- Supplied with 6L/min flow regulator fitted

CODE	TYPE	Min. Press.	PRICE
Z L 1/2 C	Single Toggle Lever Basin Tap	0.2 bar	POA

Single Tall Soft Touch Timed Flow Tap (with flow regulator)

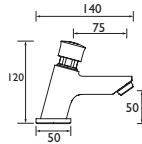

- Timed shut off to meet BS EN 816
- Soft touch easy to use mechanism
- Supplied with 5L/min flow regulator

CODE	TYPE	Min. Press.	PRICE
Z2 TBV 1/2 C	Timed Flow Tap	0.2 bar	POA

Single Luxury Soft Touch Timed Flow Tap (with flow regulator)

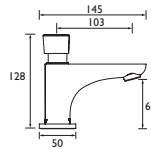

- Timed shut off to meet BS EN 816
- Soft touch easy to use mechanism
- Supplied with 5L/min flow regulator

CODE	TYPE	Min. Press.	PRICE
Z2 LUX 1/2 C	Timed Flow Tap	0.5 bar	POA

Single Pillar Basin Soft Touch Timed Flow Tap (with flow regulator)

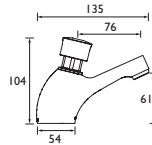

- Timed shut off to meet BS EN 816
- Soft touch easy to use mechanism
- Supplied with 5L/min flow regulator

CODE	TYPE	Min. Press.	PRICE
Z2 DUS 1/2 C	Timed Flow Tap	0.5 bar	POA

Single Basin Soft Touch Timed Flow Tap (with flow regulator)

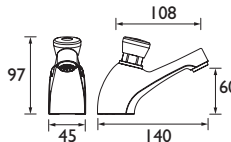

- Timed shut off to meet BS EN 816
- Soft touch easy to use mechanism
- Supplied with 5L/min flow regulator

CODE	TYPE	Min. Press.	PRICE
Z2 1/2 C	Timed Flow Tap	0.5 bar	POA

Value Non Concussive Basin Taps

- Timed shut off to meet BS EN 816
- Soft touch easy to use mechanism

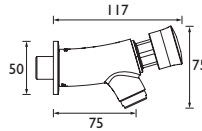

CODE	TYPE	Min. Press.	PRICE
